#### **Global Definitions**

#### Complex Type: CalendarWeekWithinMonth

Super-types: <u>DayWeekMonth</u> < CalendarWeekWithinMonth (by extension) Sub-types: None

CalendarWeekWithinMonth Name

Abstract

Documentation Specification of periods defined by relevant calendar weeks in a month, see ISO8601. Note: Calendar weeks

start with Monday. First week is the week containing the first of the month.

### XML Instance Representation

```
<com:applicableDay> com:_DayEnum </com:applicableDay> [0..7] ?
<com:applicableMonth> com: MonthOfYearEnum </com:applicableMonth> [0..12] ?
<com: dayWeekMonthExtension> com: DayWeekMonthExtensionType </com: dayWeekMonthExtensionType </pre>

Content

· Base XSD Type: string

• length <= 1024

Documentation A character string whose value space is the set of finite-length sequences of characters. Every character has

a corresponding Universal Character Set code point (as defined in ISO/IEC 10646), which is an integer.

#### Schema Component Representation

```
<xs:simpleType name="String"</pre>
   <xs:restriction base="xs:string">
    <xs:maxLength value="1024"/>
   </xs:restriction>
</xs:simpleType>
```

top

#### Simple Type: Time

Super-types: xs:time < Time (by restriction) Sub-types. None

Name Time

Content

· Base XSD Type: time

Documentation

An instant of time that recurs every day. The value space of time is the space of time of day values as defined in § 5.3 of [ISO 8601]. Specifically, it is a set of zero-duration daily time instances.

#### Schema Component Representation

```
<xs:simpleType name="Time"</pre>
   <xs:restriction base="xs:time"/>
</xs:simpleType>
```

<u>top</u>

#### Simple Type: TimePrecisionEnum

Super-types. xs:string < TimePrecisionEnum (by restriction) Sub-types: • <u>TimePrecisionEnum</u> (by extension)

Name Content TimePrecisionEnum

· Base XSD Type: string

· value comes from list:

{'tenthsOfSecond'|'second'|'minute'|'quarterHour'|'halfHour'|'hour'|'\_extended'}

Documentation

List of precisions to which times can be given.

#### Schema Component Representation

```
<xs:simpleType name="TimePrecisionEnum">
   <xs:restriction base="xs:string"</pre>
      <xs:enumeration value="tenthsOfSecond"/>
